

# Domaine CHEVALLIER BERNARD

Antoine, Chantal et Jean Pierre BERNARD

---

## TECHNICAL SPECIFICATION SHEET

**APPELLATION:** Savoie Jongieux Rouge

### Mondeuse

**REGION:** South-east France

**VINTAGE:** 2017

**GRAPE VARIETY:** Mondeuse

#### GRAPE-GROWING CHARACTERISTICS:

Soil type: glacial moraine clay-limestone soil  
Exposure: south-west  
Altitude: 400 to 500 m  
Average age of grapevines: 36 years  
Density of planting: 6000 vine plants/hectare, spacing 2.10 m between rows  
Training method: vines trained on wires, goblet pruning and cordon pruning  
Ground care: permanent grassing between rows, chemical weed control under the rows  
Work on the growing vines is carried out to ensure a very high-quality grape harvest: removing unwanted new shoots, disbudding double eyes, thinning out the leaves, cluster thinning if necessary.

**Our domain has been certified "High Environmental Value" since November 2016. (We obtained "Sustainable Agriculture" certification in December 2006).**

#### WINE PRODUCTION CHARACTERISTICS:

Grapes harvested manually  
Conveyor sorting before destemming  
Thermovinification  
Devatting with conveyor belt  
Pneumatic pressing  
Maturing in oak barrel betwing 10 to 12 months

Waste products are stored in a special tank and then spread on permanent grassland.
